4. Folding Arm Awning
5. Auto Guide Awning
6. Roller Shutters

ZIPSCREEN™ OUTDOOR BLINDS
Enjoy open-air entertaining all year round with Zipscreen™ Blinds. Developed by an Australian company, Zipscreen Blinds are specifically designed for alfresco areas, patios, balconies and verandahs. Their track-guided side channel system allows the blind to not only shade from the sun, but also help protect from the wind and rain as there are no top, bottom or side gaps.

ZIPTRAK® OUTDOOR BLINDS
Improve the functionality of your home by creating an outdoor room. A South Australian innovation, Ziptrak® Blinds use a track-guided system where the fabric is held into aluminium side channels, creating a rain and wind resistant barrier and allowing you to extend your living outdoors no matter the weather. Available in spring control or motorised for easy operation.

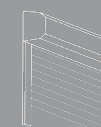

STRAIGHT DROP AWNINGS
Straight Drop Awnings are a simple solution to shade your outdoor space while still allowing you to enjoy the fresh air. Suitable for balconies, patios and windows, Straight Drop Awnings can be raised manually with spring or crank operation. Clips or straps are attached to the bottom bar, allowing you to stop the awning at varied heights for greater shade and privacy control.

FOLDING ARM AWNINGS
Maximise your outdoor space with a unique and highly flexible lifestyle awning. Folding Arm Awnings provide shade for outdoor living areas without requiring any fixed structures. Their innovative design allows the awning to retract into a discrete position against your home, allowing sun and shade to suit your needs. Customise the awning with powdercoating to match your home's colour scheme.

AUTO GUIDE AWNINGS
Stop the sun before it hits your windows with Auto Guide Awnings. Controlled by manually raising or lowering the bottom bar, the awning can be stopped at any position. The open sides allow airflow while maintaining shade and privacy. Available in a wide range of colours, patterns, block out and light filtering fabrics, to create a traditional or modern look for your home.

ROLLER SHUTTERS
The ultimate all in one solution. Roller Shutters don't just block out sunlight, they increase privacy and security, decrease noise and protect from the heat and cold. This allows you to increase your home's insulation and decrease your energy bills. Motorisation is popular with Roller Shutters for ease of operation. Available in a wide range of colours to match the exterior of your home.
